Renault ZOE

Simply revolutionary

Renault ZOE

Simply Revolutionary

With Renault ZOE, a new automotive era has begun. Tomorrow's technology taking care of you and the environment you live in today.

Imagine roads free of engine noise, with no CO₂ or NOx emissions whilst driving, a city where you can breathe more easily. Does that appeal to you?

With ZOE, rediscover the pleasure of motoring every morning: driving is a relaxed experience. A car that is clean on the outside and clean on the inside; one that you can communicate with remotely. No more queuing at petrol stations, you just have to plug it in. You save time and effort.

Come along and test drive Renault ZOE and you'll see why we're excited by it.

Dominique Lucas, Director, Electric Vehicle Range, Product Department

Expression Nav

Technology

7kW Z.E. ready domestic wallbox fitted at your home (exclusive to retail customers)
 ABS with EBD (Electronic Brake Distribution) and emergency brake assist
 Carminat TomTom® navigation system
 Chameleon™ charger allowing recharge between 60 mins and 9 hours
 Charging cable (Type 2 Mode 3) with Z.E. bag
 Climate control air conditioning with temperature and humidity sensors
 Cruise control / speed limiter
 Eco-mode with activation / deactivation button
 Econometer, battery gauge, and integrated mileage counter
 Electronic brake distribution (EBD)
 Electronic stability control (ESC) with anti-skid regulation (ASR) and understeer control (CSV)
 Hill start assist
 R.A.I.D. (Renault Anti Intruder Device) automatic door locking
 Range Optimizer: Heat pump, bi-modal braking system and Michelin ENERGY™ E-V tyres
 R-Link voice controlled 7" touchscreen multimedia device
 Z.E. Connect: remote monitoring of battery charge and estimated range
 Z.E. Voice (low speed pedestrian warning)

Interior

4 x 20W Classic radio with 2 front and 2 rear double cone speakers and single antenna
 Expression upholstery
 Front driver and passenger airbags
 Front side body and head airbag for driver and passenger
 Glovebox (7 litres)
 Height adjustable 3-point front seatbelts with pretensioners
 Height adjustable headrests on outer rear seats
 ISOFIX fittings on outer rear seats and front passenger seat
 Passenger airbag (can be deactivated to fit child seat)
 Reach and height adjustable steering wheel
 Three-point side rear seat belts with load limiters
 Tyre repair kit
 USB port, Jack, SD multimedia, Bluetooth® handsfree phone capability and voice control
 Z.E. Pre-conditioning of interior temperature from inside vehicle (activate air con / heater whilst charging)

Exterior

Deadlocking
 LED (Daytime Running Lights)

Dynamique Nav Rapid Charge

Additional equipment to Dynamique Nav

Technology

Chameleon™ Charger allowing recharge between 30 mins and 9 hours

	Expression Nav	Dynamique Nav	Dynamique Nav Rapid Charge
Range			
NEDC* (miles):	149	149	130
Summer (miles):	106	106	93
Winter (miles):	71	71	62
Charging times			
3kw	8-9 hours	8-9 hours	8-9 hours
7kw	3-4 hours	3-4 hours	3-4 hours
22kw (80%)	60 mins	60 mins	60 mins
43kw (80%)	60 mins	60 mins	30 mins

*NEDC: New European Driving Cycle, the European standard for emissions and consumption, is a method for measuring fuel consumption based on identical tests carried out on all types of vehicles in Europe, whether they are internal combustion, electric, or hybrid. It is therefore an objective test for comparing performance between models of various manufacturers but does not reflect real world range. There are two parts to the test. The vehicle is put on a roller bench and driven through the same urban cycle (cycle ECE-15) three times, followed by a single extra-urban cycle. The average of these four cycles gives the average NEDC range.

Renault ZOE

Style

We all want style in our lives, and ZOE turns heads wherever she's seen. The slimline headlights, swooping roofline, and hidden rear doors create a great first impression, even from a distance... but ZOE continues to impress up close. See how many neat little details you can spot around the car; from the cheeky 'dimples' to the designer's fingerprint, ZOE has just as much personality as you do.

Connected to your vehicle

Renault R-Link

It's the UK - so it's probably raining. You're going to have to stay a little longer than expected in the café... May as well make the most of things and start charging your ZOE right now. Why not switch on the heating too so that your car is lovely and warm when you get in? All this from your smartphone or computer without even stepping out of the door.

1.

2.

3.

4.

5.

6.

1. Display ZOE's driving range and locate charge points. 2. Listen to the radio or to music on your mobile system, look at your photos, or watch videos. 3. Make a few phone calls (hands-free, of course). 4. Retrieve your e-mails or tweets and stay connected. 5. In your ZOE, just as from your tablet or smartphone, you can purchase apps from the R-Link Store (news, travel, games, e-mail, and social networks) or make the most of the pre-installed apps. 6. You can instantly see the driving range available to you and how much battery charge you've got left via your smartphone thanks to the My Z.E. Connect Pack and with the Z.E. Interactive Pack you can set up remote battery charging, remote preconditioning and a charging schedule.

Wall-Box

Included

No fuss, clean, easy - these are all things that we love about Electric Vehicles. But to make your life even easier and give you the maximum enjoyment of your Renault ZOE, we have teamed up with our preferred Electric Vehicle charging partner, Chargemaster, to take advantage of a government grant of up to 75% support.

We will exclusively offer our retail customers a FREE¹ 7kW Homecharger fully installed at your home², as part of your purchase of a new Renault ZOE. The charger's 7kW capacity means that you can charge your ZOE completely, from flat-to-full in just 3 - 4 hours.

- Chargemaster Homechargers are fully tested by Renault and carry the Renault ZE Ready certification, ensuring these are perfectly compatible with your Renault ZOE
- Manufactured from an ABS injection moulding, the Homecharger which has optimal weather resistance, and is perfectly suited for both indoor and outdoor use
- Key controlled access, so there's no risk of someone using your charger without your consent
- Ergonomic and discrete design, so that the charging cable can be neatly coiled when not in use
- Built-in communications module, enabling free access to the electrical consumption data³ of your charger for 4 years after the installation date, via a dedicated web portal called Chargevision

As long as you have off-street parking and modern household electrics, you're eligible⁴ for your Wall-Box installation

A little information about Chargemaster ...

Chargemaster is the UK's leading provider of domestic charging solutions, having supplied over 18,000 domestic charging units to date in 12 European countries. Chargemaster Homechargers are manufactured right here in the UK, at Chargemaster's modern manufacturing facilities. Chargemaster offers a comprehensive installation service with their team of experienced and qualified engineers, right across the UK.

Once you have had your Chargemaster Homecharger installed, you will be able to apply for your POLAR Network Card. This gives you completely free access to the National Polar network for a period of six months. Cost of electricity is included for this period and allows charging at 3,000 key locations across the country.

¹ Based on eligibility of the Renault wallbox included offer and meeting the qualifying criteria of the OLEV (Electric Vehicle Homecharge Scheme) subsidy of £700.00 (including VAT). Full Terms and conditions- http://www.chargemasterplc.com/index.php/terms_conditions/ ² Based on a standard single-phase domestic installation, carried out by 1 man within a maximum of 6 man hours – cable run under 20 metres, no civil works and no electrical remedial work required, asbestos free site, working at normal height. Other costs may apply to a specific installation, which will be confirmed before any work is undertaken. ³ Indicative information – subject to transmission of data and O2 network coverage. ⁴ The key qualifying criteria for a subsidised homecharger is to prove ownership/primary use of an EV, live in a home with modern household electrical installation and have off-street parking and/or a garage. Finally you need to agree that you will not be claiming back the VAT on the installation and to have the charger's electrical consumption data monitored by OLEV for a period of 3 years from the date of installation. https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/418525/electric-vehicle-homecharge-scheme-guidance-for-customers-2015.pdf Your vehicle must equally be on the approved plug-in car grant list - <https://www.gov.uk/plug-in-car-van-grants/eligibility>

Wall-Box installation - It's as simple as 1,2,3...

Renault will make Chargemaster aware of your Wall-box application request

Chargemaster will process your application and contact you, discuss your household electrics, and arrange an installation date with you

Chargemaster will send an installation engineer to carry out the installation, normally within 2 - 3 weeks from completion of your application

60 Patents:

What for?

So you can drive around in a car that gives you everything your current vehicle does, with more connectivity and style yet less hassle, noise and stress, and a best-in-class driving range. Let's take a closer look at the state-of-the-art technologies that allowed the ZOE to achieve a driving range of 130 miles* on a single charge during its approval process.

ZOE is the first mass-produced electric vehicle with an NEDC* driving range of over 130 miles**. But what does this figure mean? Just like any other vehicle approval process, it is performed under ideal driving conditions (no heating or air conditioning is used). The results allow a true comparison to the performance of the other electric vehicles. As is the case for internal combustion vehicles, speed, hills, driving style, and the use of heating or air-conditioning will all have an impact on the actual driving range. So for example, on a suburban road, if you are driving the ZOE Dynamique Nav Rapid Charge, you might generally achieve around 62 miles in the winter season and 93 miles in the warmer season.

If you were driving the ZOE Expression Nav or ZOE Dynamique Nav, these figures would increase to 71 miles in the winter season and 106 miles in the warmer season. This is due to the increased efficiency of the new R240 motor available on ZOE Expression Nav and Dynamique Expression Nav.

*NEDC: New European Driving Cycle, the European standard for emissions and consumption, is a method for measuring fuel consumption based on identical tests carried out on all types of vehicles in Europe, whether they are internal combustion, electric, or hybrid. It is therefore an objective test for comparing performance between models of various manufacturers. There are two parts to the test. The vehicle is put on a roller bench and driven through the same urban cycle (cycle ECE-15) three times, followed by a single extra-urban cycle. The average of these four cycles gives the average NEDC range. Please see the technical specifications page for more details on range. **The official NEDC driving range is 124 miles with 17" wheels. With ZOE Dynamique Nav Rapid Charge.

The range optimizer system

This groups together three major innovations that make ZOE's performance possible. What are they?

- **New-generation regenerative braking**

The battery receives energy not only each time the car decelerates when the driver takes his/her foot off the accelerator but also, and this is what's new, when the driver presses the brake pedal.

- **Heat pump**

Rather than drawing on the battery, the 'reverse-air conditioning' system captures energy from the air to warm, or cool, the cabin. One single system that performs two functions!

- **Michelin Energy™ E-V Tyres**

Specially designed for Renault ZOE, they offer ultra-low resistance when driving. They have the same road handling and braking capacity as the Michelin tyres used on other vehicles.

Optimize the driving range with Renault ZOE

Renault ZOE offers you a wide range of measures to maximise your driving range.

- **Pre-conditioning**

This allows you to programme the heating or air conditioning while ZOE is still charging. In this way the power used to create the ideal cabin temperature does not deplete the battery.

- **Eco mode**

The Eco button moderates air-conditioning or heating power and performance for greater driving range.

- **Eco-driving tips**

ZOE can help give you advice on how to make the most of the energy at your disposal.

1. Underfloor battery for maximum interior space and boot volume. 2. Only one third of the vehicle is glazed to make it more stylish and improve energy efficiency. 3. Space for five people. 4. 338 litres boot volume. 5. New-generation regenerative braking. 6. MICHELIN ENERGY™ E-V tyres. 7. Heat pump. 8. Chameleon™ charger: three possible charging modes using one single charger.

Think Electric

We designed ZOE so that it is simple to use, a pleasure to drive, and easy for everyday life. For example, we've used less glass in the design to help the climate control work more efficiently. As for the underfloor battery, it lowers the centre of gravity, which ensures good road handling and maximises the interior space and the boot volume.

The Chameleon™ Charger

ZOE is the first electric vehicle to be fitted with the Chameleon™ Charger patented by Renault. The Chameleon™ adapts to the various power levels available for charging. This innovation means Renault ZOE is compatible with standard charging (3 to 9h) and accelerated charging (80% in 1hr[†]). On top of this, with the Renault ZOE Dynamique Nav Rapid Charge, ZOE is compatible with rapid charging (80% in 30 min[†]), all using one single charger.

Charge points on the Renault R-Link

R-Link features TomTom® navigation which will show charge points near you, or on your route.

The battery

Just like the other models in the Renault Z.E. Range, ZOE is fitted with a lithium-ion battery, offering great performance. It is very simple to charge, even when it is fully discharged. It can also be recycled at the end of its life.

- ZOE is environmentally friendly: no smell, very quiet, and zero g/km of CO₂ (while in use).[‡]
- ZOE maximizes recycling: 85% recyclable by mass and includes 9% recycled plastic (100% in the case of the battery).
- ZOE features an electric engine with a wound rotor putting out 65 kW or 87 hp.
- ZOE allows instant acceleration and pick-up even at low revs, thanks to the 220 Nm peak torque available at full force from just 250 rpm.

[†] Battery charged from a public charge point.

[‡] Zero CO₂ emissions from the tailpipe.

Renault are part of "Go Ultra Low", the new Government-backed campaign promoting the purchase and use of ultra low emission vehicles by private consumers as well as commercial and fleet vehicles.

This campaign is unique. It is a jointly funded partnership between government and five leading global vehicle manufacturers, all committed to delivering great vehicle performance and lower emissions. Renault is proud to be part of this campaign. It is a proactive approach to raise awareness of the fantastic innovations on our roads today and innovation is at the heart of the automotive industry.

Purchase options

For your ZOE

We have created two ownership options to allow you to tailor how you buy your car.

How it works - Battery hire

This ZOE offering allows you to buy the vehicle and lease the battery, which not only reduces the purchase price, but also gives maximum peace of mind.

You only pay for what you need – you tell us how many miles you'll do and how long you'd like to keep your Z.E.; we personalise your battery hire monthly payment to your own individual requirements.

Battery performance is guaranteed to at least 75% of its original charge capacity. If not, we'll repair or replace it.

No worries – complete 24/7 roadside assistance, even if you run out of charge.

You enjoy your Z.E. while we keep its heart healthy. It's that easy.

If the vehicle is sold to a dealer or another person, the customer simply signs the declaration form to confirm the new owner's details and sends it to Renault finance. Your obligation will cease once the new owner takes over the battery hire agreement.

Pricing

MODEL	INSURANCE GROUP	BASIC PRICE (£)	VAT 20% (£)	TOTAL RETAIL (£)	TOTAL RETAIL PRICE AFTER PICG ¹	MANUFACTURER'S 'ON THE ROAD' PRICE AFTER PICG ^{1*}
Expression Nav	15E	14,829.17	2,965.83	17,795.00	£12,795.00	£13,445.00

PICG - PLUG IN CAR GRANT

In order to help reduce carbon emissions in the UK, the Government has launched the Plug in Car Grant (PiCG) scheme which is intended to run from April 2015. The scheme will be managed by OLEV (Office for Low Emission Vehicles) who are a cross Government team within the Department for Transport. This scheme provides a grant of 35%, up to a maximum value of £5,000, towards the cost of a new ultra-low carbon car, which is provided to a consumer at the point of purchase. The grant is applied to the Total Retail Price which includes the Basic Price and the VAT (this excludes the delivery charge, first registration and any optional extras).

Accessories

Protection pack

Protect your ZOE from the perils of the road and the car park with the protection pack.

1. Boot liner: The custom-made boot liner allows you to place various items in the boot (especially dirty items) and is a good way of protecting the original carpet. **2. Alarm:** The essential accessory to ensure the car's security. It will protect effectively from theft of the car and objects inside it. **3. Door sill trim:** Add an extra touch of class to your Renault ZOE.

Luxe pack

Enhance the comfort, practicality and style of your ZOE with the Luxe pack.

1. Rear head restraint: Improve passenger comfort with the central rear head restraint. Available in a range of colours to match the car's interior trim. **2. Central armrest:** For improved driver comfort, the central armrest also provides a practical storage area. Available in Blue, Light Grey, or Black. **3. Boot net:** Prevent your belongings from getting damaged on the move with the boot net.

Delivery pack

1. Premium mats: Available in two different colours to harmonise with your car colour choice, these made to measure carpet mats will protect your car's carpet. **2. Safety kit:** Complete kit including a warning triangle, a thermal blanket, a vest and a first aid kit.

Premium delivery pack

Upgrade your delivery pack with the special Z.E. designed mats. They simply clip into the pins the vehicle comes fitted with. Made from rubber, they are easy to clean.

DAB digital radio

The ZOE DAB system gives crystal-clear sound and a vast array of stations.

(1) NEDC: New European Driving Cycle, the European standard for emissions and consumption, is a method for measuring fuel consumption based on identical tests carried out on all types of vehicles in Europe, whether they are internal combustion, electric, or hybrid. It is therefore an objective test for comparing performance between models of various manufacturers but does not reflect real world range. There are two parts to the test. The vehicle is put on a roller bench and driven through the same urban cycle (cycle ECE-15) three times, followed by a single extra-urban cycle. The average of these four cycles gives the average NEDC range. (2) The official NEDC driving range is 124 miles with 17" wheels. (3) Fuel consumption and emissions measured in accordance with applicable regulations.

FOUR YEARS WARRANTY & RENAULT ASSISTANCE

WITH 4 YEARS WARRANTY AND RENAULT ASSISTANCE AS STANDARD

4 YEARS RENAULT Z.E. WARRANTY

Your vehicle is covered by a warranty package for up to 4 years/100,000 miles (whichever comes first). The first 2 years are unlimited mileage, followed by a further 2 years up to 100,000 miles. The electric powertrain also has a warranty of up to 5 years/100,000 miles (first 2 years unlimited mileage). Your dealer is able to repair or replace, without charge, parts that are found to have a material or assembly defect that is recognised by Renault. The paintwork warranty runs for a period of 3 years and the anti-corrosion warranty for a period of 12 years.

4 YEARS RENAULT Z.E. RENAULT ASSISTANCE

Should you need it, we'll provide emergency roadside repairs or tow you to the nearest Renault Z.E. dealer. This service is available 24 hours a day, every day of the year. Renault Assistance Cover provided from months 0 to 48 includes, assistance at the roadside and home, national recovery, onward travel with European cover from months 0 to 36 only. Cover includes mechanical or electrical defects covered by the warranty.

For Z.E. vehicles with a Battery Hire Contract the Renault Assistance cover is linked to the period of the Battery Hire Contract with RCI Financial Services Ltd.

SERVICING

Take advantage of Renault's suite of Service Plans available over three or four years. The 3 year/30,000 mile (whichever comes first) Service Plan is available at the recommended retail price of £399 and the 4 year/40,000 mile Service Plan available at £599.

The Renault Service Plan covers the manufacturer's minimum service and maintenance programme requirements including parts, labour and VAT, but excluding normal wear and tear items such as brake pads, windscreen wipers or tyres for the period chosen.

FINANCE OPTIONS

There are a wide variety of ways in which the purchase of a new vehicle can be financed. Renault Finance offers all of them, so whether you're a fleet buyer or private buyer, Renault Finance is ideally placed to tell you which plan or combination of plans best suits your needs and circumstances.

4+ The 2015 4+ package applicable to new vehicles when ordered from a UK Renault Approved Dealer from 1 January 2015. All vehicles provided with 4 years' warranty and Renault Assistance as standard. For warranty exclusions refer to Terms & Conditions. For full Renault Warranty Terms and Conditions visit www.renault.co.uk/warranty. For Renault Assistance Terms and Conditions visit www.renault.co.uk/assistance. The Renault Service Plan covers the manufacturer's minimum maintenance programme requirements for the term and of the plan purchased (refer to the Warranty and Service sheet in the Handover Document wallet for details). The plan ends when you reach the age or mileage limit (whichever comes first). Services must be carried out in line with the servicing intervals and can only be carried out at a Renault Approved UK outlet. To qualify you must order and purchase the Service Plan from a Renault Approved UK outlet before the first service is due or 12,000 miles (whichever comes first). Cannot be part exchanged, refunded or transferred. Finance provided by RCI Financial Services Ltd, P.O. Box 149, Watford, WD17 1FJ. Guarantees and indemnities may be required. You must be at least 18 and a UK resident (excludes Isle of Man and Channel Islands) to apply. Subject to status, terms and conditions apply.

RENAULT INSURANCE

A car as well designed as your Renault deserves an insurance policy to match. Renault Insurance has been specifically created to provide superb protection for you and your car. In addition to a very competitive premium, Renault Insurance also includes: Renault Genuine parts fitted in Renault Accident Repair Centres, protecting your 12 year anti-corrosion warranty; repairs guaranteed for 3 years; a courtesy car for the duration of any repairs - subject to availability when you use an approved repairer; payment by instalments - subject to status.

Lines open 8am - 8pm weekdays, 9am - 5pm Saturdays and 10am - 3pm Sundays. Calls may be recorded. All quotes are based on individual circumstance and subject to insurers underwriting criteria. Renault Insurance is arranged and administered by iGO4 Partners Limited which is authorised and regulated by the Financial Conduct Authority. Financial Services Registration Number 490061. Registered Office: Sundance House, Staniland Way, Werrington, Peterborough, PE4 6JT. Registered in England & Wales No. 6710272.
